

Directions for Medicare.gov Enrollments

This must be completed between October 15th and December 7th 2015!

To review your Prescription Plan options, follow the instructions below.

1. Go online to: **Medicare.gov**
2. Click on **"Find health & drug plans"** green button
3. Enter your ZIP code and county if requested, click on **"Find Plans"**
4. Click **"I don't know"** for both questions to bypass and go to the next screen by clicking "Continue to plan results"
5. Enter the "drug name" & confirm dosage and frequency and then click **"Add drug and dosage"**. It is best to use monthly. You can also enter your drug list ID # and password date if available!
6. Continue to add drugs until all your drugs are entered or if working an existing list please make any changes necessary.
7. Once you have completed your list of medications, write down the **Drug List ID** and **Password Date** listed on the right of the screen. This can be used later to check plans and change medications if necessary.
8. Click **"My Drug List is Complete"**
9. You now need to select pharmacies (Max 2) (this is a must) and only these will be used to calculate pricing!
10. Click **"Continue to Plan Results"**
11. Click **"Prescription Drug Plans"** then click **"Continue to plan results"**.
12. Now look under **"Prescription Drug Plans"** for the different plan options based on your current medications.
13. This list is sorted by the lowest total out of pocket for a given period (usually calendar year).
14. Please print this listing

What your results show:

You will now see the lowest (total) cost plan at the top. The expected cost is calculated based on the medications you entered and the monthly premium with any deductible and copays associated with the plans.
